Austrian consultants deliver outstanding quality

Knowledge intensive business service providers from Austria

Year over year Austria ranks amongst the most successful countries in practically all international rankings on the most diverse range of topics. The enterprises which ensure that this little country in the heart of Europe is a world leader not only in terms of its quality of life, environment and tourism, but also in terms of its technology and knowledge, are internationally respected and in demand abroad.

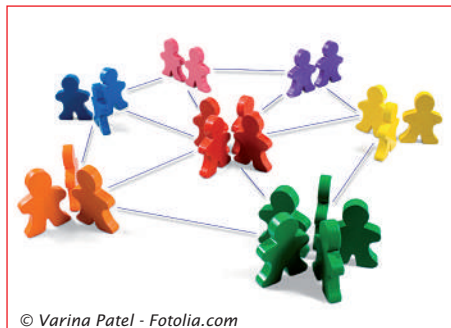

Impressive international experience

Thanks to the high level of international demand for Austrian quality, technology and innovation, many of the best firms already have an impressive amount of international experience. In order to be better able to bring these advantages to bear, to make efficient use of them, and to achieve synergies, 250 Austrian planning and consulting firms in different sectors have come together in a platform known as Austrian International Consultants (AIC). Each of

these firms has a number of international successes to its name. In addition to their specialist skills, they are all characterised by an extremely high capacity to innovate and to cooperate.

AIC platform serves as an initiator, catalyser and guarantor of quality

The AIC platform allows these architects, engineers, IT and management consultants as well as CPA, tax consultants and law attorneys and finance specialists to respond quickly and directly to the needs of our international clientele by interacting, working together, forming consortia, as well as ma-

king and realising joint plans. The AIC platform serves as an initiator, catalyser and guarantor of quality. For interested parties from all over the world on the lookout for outstanding Austrian quality, the AIC is a competent partner with a thorough knowledge of the know-how that is available in the country and with direct contacts to the most appropriate providers.

In close cooperation with the Austrian Trade Organisation (www.advantageaustria.org), AIC is part of „go-international“, an internationalisation initiative coordinated jointly by the Federal Ministry of Economy, Family and Youth and the Austrian Federal Economic Chamber. The main task of the AIC platform is to make international customers aware that their goals can be reached more easily by cooperating with competent partners than by going it alone.

Online Services

The web portal www.a-i-c.at provides a multitude of information and access to various database services for export-oriented service companies as well as for their customers abroad. In addition to a searchable database containing profiles and references of Austrian planners and consultants with export success, the website also incorporates TEAM-BUILDER, an international communication and cooperation platform.

We are at your disposal. Your requirements are our opportunity. For more information, please contact:
